**Detailed Action**

1.) The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2.) Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added limitation in claim 1 that the output voltage of the current circuit is “always” higher than the output voltage of the second rectifier circuit constitutes new matter. There is no disclosure in the specification as originally filed that the current circuit output voltage is always higher than the output voltage of the second rectifier circuit and there is no disclosure, neither explicit nor implicit, as to how such a result would be achieved. The other claims are deemed to include new matter because they depend from claim 1.

3.) Applicant is advised that if he removes the new matter from claim 1 as identified above, claims 1-3 would be subject to the rejection under 35USC103, of record.

4.) Applicant’s “Remarks” filed on 1/29/2007 have been given careful consideration, but are not persuasive of patentability. The claims are deemed to contain new matter as discussed

above. Applicant is advised that if he removed the above-identified new matter from claim 1 and suitably amended the claim to incorporate the features associated with elements 21 and 22 in figure 2, the claim would be given favorable consideration. For example, after deleting "always" in the next to last line of claim 1, the third paragraph of claim 1 could be amended to read: --  
wherein a voltage is applied to the current circuit from the transformer through a pair of capacitors and is higher than a voltage applied to the second rectifier circuit from the transformer

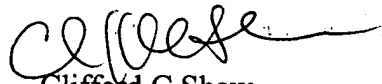

--.
